CONSUMER TIME

C762

CP 5

NETWORK: NBC

DATE: March 3, 1945

ORIGIN: WRC - PICK-UP FROM HOLLYWOOD

TIME: 12:15-12:30 PM- EWT

(Produced by the War Food Administration, this script is for reference only and may not be broadcast without special permission. The title CONSUMER TIME is restricted to network broadcast of the program...presented for more than eleven years in the interest of consumers.)

-000-

CASH REGISTER RINGS TWICE...MONEY IN TILL

It's CONSUMER TIME!

CASH REGISTER...CLOSE DRAWER.

4. ANNCR: During the next fifteen minutes the National Broadcasting Company and its affiliated independent stations make their facilities available as a public service for the presentation of CONSUMER TIME by the War Food Administration. And here are Mrs. Freyman and Johnny!

5. JOHN: Well, Mrs. Freyman...it's VICTORY GARDEN time again! Time to get out the seed catalogue and decide whether you're going to plant Beefsteak Tomatoes...or Earlianas!

6. FREYMAN: Or whether you ought to try growing popcorn this year alongside those two rows of Golden Bantam...

7. JOHN: Yes sir...it's sure high time to begin to think about it. I know a fellow who's already got Victory Gardens on his mind. Talks about it all the time.

8. FREYMAN: I can guess who that is, Johnny! None other than our famous guest on CONSUMER TIME today...the hilarious star of radio and screen... Bob Burns! In a minute, Bob Burns is going to talk to us from Hollywood. He's put aside his Bazooka for a rake and hoe...and he's raring to get started on one of the most important homefront activities of the year 1945...planting a Victory Garden.

9. JOHN: Yes...we're going to need those Victory Garden vegetables more than ever this year...and that's a fact. Our Armed Forces are asking for more and more canned foods...and that means we must grow more here at home for our civilian needs.
10. FREYMAN: So, Johnny...let's hear/about it from the Arkansas expert himself! With Bob Burns out there in Hollywood...is Norvell Gillespie, NBC's Victory Garden director!
- ENGINEER: WATCH SWITCH COMING UP AT 12:16:30 pm EWT...(9:16:30 a.m. FWT)
CUE IS UNDERLINED.
11. JOHN: Between the two of them, we should learn a-plenty about gardens! So...here we go, Bob Burns! CONSUMER TIME takes you to Hollywood, California.
12. ANNCR: No doubt you, too, were shocked December 26 when canned fruits and vegetables were suddenly placed back on the ration list. You were rudely jolted for a while. Then the realization came that the war was far from won, and a lot of food would be desperately needed in the months to come. That's why it means you've got to get busy growing your own fresh vegetables in order to help the nation's food pinch.

Now, in just a moment, we'll bring you Bob Burns, the Arkansas sage, who has a serious side to him when it comes to raising food. Few people know it, but besides the home-spun philosophy which has made him famous, he's a very very successful farmer. Then you'll also hear from Norvell Gillespie, Pacific Coast director of the National Victory Garden Institute, who has kept a close watch on the war garden campaign ever since Pearl Harbor. And we also want you to hear from Mrs. Janet Atkins, a West Coast housewife, who's facing the same rationing problem that the rest of you are all over the country. But right now, here's Norvell Gillespie, our Victory Garden director for NBC's Western Division.

13. NORV: Thank you, _____ . Good morning, everyone. Most of you probably think these Hollywood movie stars and radio "top notchers" like Bob Burns don't know any thing about gardening... but you'd be surprised. Bob has 550 acres under cultivation out here in the San Fernando Valley, and he specializes in Berkshire hogs and sugar beets.
14. BOB: (INTERRUPTS) Speakin' of sugar beets, three of my neighbors took prizes over at the Pomona Fair last fall with MY sugar beets!
15. NORV: They tell me you raise pretty good turnips, too, Bob.
16. BOB: Now, Norv, you get me started talkin' about my turnips and folks'll think that's the only thing they're supposed to grow in a Victory Garden. But I'll tell you one thing...they make mighty good eatin'. You know the little turnips is a mighty mis-understood vegetable. Folks've been goin' along for years thinkin' all you could eat of a turnip was the roots. And that just ain't so. I can understand why some folks might not care for the turnip root...but you take the tops...I'm tellin' you, there you have a real delicacy...it's one of the most delicious greens that we have...you can cook it like spinach, or serve it in a green salad...well, you see what I mean...you see what happens when I get started talkin' about turnips.
17. NORV: Well, anyway, we know you have them in your Victory Garden. I kind of gather you enjoy working in that garden, Bob.
18. BOB: You bet I do. There's nothin' like watchin' those little green shoots comin' up out of the ground...right where you put the seeds a couple of weeks before. And you know, I learned something else, that kind of puts an extra kick into working in the garden.
19. NORV: What's that?

"stir" atau bagi untuk seseorang yang masih belum dikenal dengan baik. Seseorang yang baru kali kali bertemu dengan seseorang lainnya biasanya akan mengatakan "aku belum pernah bertemu dengan kamu sebelumnya" dan dia akan merasa senang.

• and kuma like you
• 1920. 61

• and you're so kind, adam, i hope to find you (STEREOTYPE) • 1920. 61

20. BOB: Well, the other day I was over at the county agent's office, and he told me that over half the families in the United States had Victory Gardens last year. That's a powerful lot of people.
21. NORV: Powerful is right. That means eighteen and a half MILLION Victory Gardens.
22. BOB: Well, don't that kind of make you feel good...to figure that eighteen or twenty million other American's workin' right along with you...diggin' into that good American soil, and makin' stuff grow for our country?
23. NORV: You bet it does, Bob. And right now, I'd like you to meet one of those neighbors who HAS been working as part of that tremendous team of American Victory Gardeners. I'd like you to meet, Mrs. Janet Atkins of Los Angeles...and I don't think she'd mind my telling you that she's the mother of two children, that her husband is busy in a war plant, and that she has a 6 room house to take care of...and yet she finds time to cultivate a very productive 40 by 60 foot Victory Garden. Mrs. Atkins, Bob Burns.
24. BOB: How do you do, Ma'am.
25. JANET: How do you do, Mr. Burns.
26. NORV: How did you get started at Victory Gardening, Mrs. Atkins?
27. JANET: Well, the Government authorities...I suppose it was the U. S. Department of Agriculture...asked everyone to raise vegetables. Before the war, I grew flowers, so it was easy to convert over to vegetables.
28. NORV: In my contacts with big industry, Bob, I find that thousands of these industrial workers never had a spade in their hands before, and yet they've turned out to be expert Victory Gardeners. I know that that's true all over the nation because of the reports that the Institute sends out.

(F) The quality of these vases and the ware as well as the glaze and the
clay are perfect and all sufficient and finer ware could not be found at
any other place in the country. These vases are made of yellowish
clay often a few months back and painted in various
colours.

the stuff which you will be able to get at the station. I would like to get something
which is not too strong, so as not to offend the people who may be near.
I am sending you a copy of the letter I wrote to Mr. G. W. C. Smith, the
Secretary of State, asking him to do all he can to help us. He has written back to me
and said that he would do all he could to help us. He has written back to me
and said that he would do all he could to help us.

The experience of past trials of local systems and their extension to adjacent areas will assist in their further development. Furthermore, as it is anticipated that oil shale will be used primarily by large corporations, the author will be concerned with the use of large-scale shale units.

29. BOB: Well, you know, Norv, it's kind of a natural thing for anybody to work in the garden...and most folks find that out once they've started...there's something about getting your hands down into the ground, and gettin' the feel of the soil between your fingers ...I don't know what it is...but it's a part of your life you shouldn't get too far away from.
30. NORV: Well, Bob, I wonder if it has anything to do with the fact that the basic composition of the human body is not too different from that of a plant...according to science we're all made up, basically, of chemicals, and electric currents.
31. BOB: Yes sir...kind of like a storage battery..and if you want to keep your batteries charged, you have to have contact with the ground...or better yet, you've got to put some roots down.
32. NORV: Sounds like a little of that Arkansas philosophy, Bob. Maybe it's philosophy, and maybe it isn't. But I do know that you can trace the source of all living things right back to the good earth. And our health and happiness depend a whole lot on how wisely we use those things that grow in the ground.
33. NORV: Those sound like wise words to me, Bob.
34. BOB: Well, now Mrs. Atkins, we've kind of left you standing there in the cold while we went wanderin' off on this philosophy business.
35. JANET: Oh, I was agreeing with you, But I would like to take this chance to ask Mr. Gillespie a question or two.
36. NORV: Surely...go ahead. Shoot.
37. JANET: Well, will there be any trouble getting the necessary seed and fertilizer, insecticides and tools this year? Is the shortage of these items over?

the type of plant known to both with which you can, if I'm not wrong, make a fairly safe guess concerning what those old names referred to. I have not yet learned how to identify these particular plants, but you may be able to tell me what they are, because I have had the pleasure of looking at them, and the last word I have

had is that you can tell them by their flowers. The first old name you mentioned is "Red Root" (I think), and I have been told several times now that the root has a red tint and that the flowers are red. The second old name is "Yellow Root" and I have been told that the flowers are yellow. The third old name is "White Root" and I have been told that the flowers are white. The fourth old name is "Black Root" and I have been told that the flowers are black. The fifth old name is "Blue Root" and I have been told that the flowers are blue. The sixth old name is "Green Root" and I have been told that the flowers are green. The seventh old name is "Brown Root" and I have been told that the flowers are brown. The eighth old name is "Yellow Root" and I have been told that the flowers are yellow. The ninth old name is "White Root" and I have been told that the flowers are white. The tenth old name is "Black Root" and I have been told that the flowers are black. The eleventh old name is "Blue Root" and I have been told that the flowers are blue. The twelfth old name is "Green Root" and I have been told that the flowers are green. The thirteenth old name is "Brown Root" and I have been told that the flowers are brown. The fourteenth old name is "Yellow Root" and I have been told that the flowers are yellow. The fifteenth old name is "White Root" and I have been told that the flowers are white. The sixteenth old name is "Black Root" and I have been told that the flowers are black. The seventeenth old name is "Blue Root" and I have been told that the flowers are blue. The eighteenth old name is "Green Root" and I have been told that the flowers are green. The nineteenth old name is "Brown Root" and I have been told that the flowers are brown. The twentieth old name is "Yellow Root" and I have been told that the flowers are yellow. The twenty-first old name is "White Root" and I have been told that the flowers are white. The twenty-second old name is "Black Root" and I have been told that the flowers are black. The twenty-third old name is "Blue Root" and I have been told that the flowers are blue. The twenty-fourth old name is "Green Root" and I have been told that the flowers are green. The twenty-fifth old name is "Brown Root" and I have been told that the flowers are brown. The twenty-sixth old name is "Yellow Root" and I have been told that the flowers are yellow. The twenty-seventh old name is "White Root" and I have been told that the flowers are white. The twenty-eighth old name is "Black Root" and I have been told that the flowers are black. The twenty-ninth old name is "Blue Root" and I have been told that the flowers are blue. The thirtieth old name is "Green Root" and I have been told that the flowers are green. The thirty-first old name is "Brown Root" and I have been told that the flowers are brown. The thirty-second old name is "Yellow Root" and I have been told that the flowers are yellow. The thirty-third old name is "White Root" and I have been told that the flowers are white. The thirty-fourth old name is "Black Root" and I have been told that the flowers are black. The thirty-fifth old name is "Blue Root" and I have been told that the flowers are blue. The thirty-sixth old name is "Green Root" and I have been told that the flowers are green. The thirty-seventh old name is "Brown Root" and I have been told that the flowers are brown. The thirty-eighth old name is "Yellow Root" and I have been told that the flowers are yellow. The thirty-ninth old name is "White Root" and I have been told that the flowers are white. The forty-old name is "Black Root" and I have been told that the flowers are black. The forty-first old name is "Blue Root" and I have been told that the flowers are blue. The forty-second old name is "Green Root" and I have been told that the flowers are green. The forty-third old name is "Brown Root" and I have been told that the flowers are brown. The forty-fourth old name is "Yellow Root" and I have been told that the flowers are yellow. The forty-fifth old name is "White Root" and I have been told that the flowers are white. The forty-sixth old name is "Black Root" and I have been told that the flowers are black. The forty-seventh old name is "Blue Root" and I have been told that the flowers are blue. The forty-eighth old name is "Green Root" and I have been told that the flowers are green. The forty-ninth old name is "Brown Root" and I have been told that the flowers are brown. The fifty-old name is "Yellow Root" and I have been told that the flowers are yellow. The fifty-first old name is "White Root" and I have been told that the flowers are white. The fifty-second old name is "Black Root" and I have been told that the flowers are black. The fifty-third old name is "Blue Root" and I have been told that the flowers are blue. The fifty-fourth old name is "Green Root" and I have been told that the flowers are green. The fifty-fifth old name is "Brown Root" and I have been told that the flowers are brown. The fifty-sixth old name is "Yellow Root" and I have been told that the flowers are yellow. The fifty-seventh old name is "White Root" and I have been told that the flowers are white. The fifty-eighth old name is "Black Root" and I have been told that the flowers are black. The fifty-ninth old name is "Blue Root" and I have been told that the flowers are blue. The sixty-old name is "Green Root" and I have been told that the flowers are green. The sixty-first old name is "Brown Root" and I have been told that the flowers are brown. The sixty-second old name is "Yellow Root" and I have been told that the flowers are yellow. The sixty-third old name is "White Root" and I have been told that the flowers are white. The sixty-fourth old name is "Black Root" and I have been told that the flowers are black. The sixty-fifth old name is "Blue Root" and I have been told that the flowers are blue. The sixty-sixth old name is "Green Root" and I have been told that the flowers are green. The sixty-seventh old name is "Brown Root" and I have been told that the flowers are brown. The sixty-eighth old name is "Yellow Root" and I have been told that the flowers are yellow. The sixty-ninth old name is "White Root" and I have been told that the flowers are white. The七十老名是"黑根"，我被告诉花是黑色的。The 70th old name is "Black Root" and I have been told that the flowers are black.

The 71st old name is "Blue Root" and I have been told that the flowers are blue. The 72nd old name is "Green Root" and I have been told that the flowers are green. The 73rd old name is "Brown Root" and I have been told that the flowers are brown. The 74th old name is "Yellow Root" and I have been told that the flowers are yellow. The 75th old name is "White Root" and I have been told that the flowers are white. The 76th old name is "Black Root" and I have been told that the flowers are black. The 77th old name is "Blue Root" and I have been told that the flowers are blue. The 78th old name is "Green Root" and I have been told that the flowers are green. The 79th old name is "Brown Root" and I have been told that the flowers are brown. The 80th old name is "Yellow Root" and I have been told that the flowers are yellow. The 81st old name is "White Root" and I have been told that the flowers are white. The 82nd old name is "Black Root" and I have been told that the flowers are black. The 83rd old name is "Blue Root" and I have been told that the flowers are blue. The 84th old name is "Green Root" and I have been told that the flowers are green. The 85th old name is "Brown Root" and I have been told that the flowers are brown. The 86th old name is "Yellow Root" and I have been told that the flowers are yellow. The 87th old name is "White Root" and I have been told that the flowers are white. The 88th old name is "Black Root" and I have been told that the flowers are black. The 89th old name is "Blue Root" and I have been told that the flowers are blue. The 90th old name is "Green Root" and I have been told that the flowers are green. The 91st old name is "Brown Root" and I have been told that the flowers are brown. The 92nd old name is "Yellow Root" and I have been told that the flowers are yellow. The 93rd old name is "White Root" and I have been told that the flowers are white. The 94th old name is "Black Root" and I have been told that the flowers are black. The 95th old name is "Blue Root" and I have been told that the flowers are blue. The 96th old name is "Green Root" and I have been told that the flowers are green. The 97th old name is "Brown Root" and I have been told that the flowers are brown. The 98th old name is "Yellow Root" and I have been told that the flowers are yellow. The 99th old name is "White Root" and I have been told that the flowers are white. The 100th old name is "Black Root" and I have been told that the flowers are black.

38. NORV: Well, the latest word from the Department of Agriculture headquarters in Washington, D. C., is that there's plenty of vegetable seeds for all. As far as fertilizer and insecticides are concerned, there won't be any to waste, but there will be sufficient to go around. Tools? There are enough of those being manufactured to take care of everyone's needs.
39. JANET: Well, that answers that question all right. What's your answer to people who say they don't have enough space...and wouldn't be able to raise too many vegetables anyway.
40. BOB: Why, any farmer knows that succession cropping is the answer. Make the same piece of ground give you two or three crops in one season. That's no idle theory; it's a fact.
41. NORV: I'll go along with you there, Bob. Besides that, some of the finest Victory Gardens I've seen up and down the whole Pacific Coast have been small ones. Believe me, they've certainly produced.
42. BOB: Norv, have you got any official facts on what the little home gardens produced last year?
43. NORV: I'll say I have. I've got some figures here we can really be proud of. Just listen to this: Last year, over 40 percent of all the fresh vegetables grown, came from home gardens.
44. JANET: But a lot of the vegetables from the commercial gardens didn't go to the home front, did they?
45. BOB: No sir...our fighting men and our Allies needed a lot of those. So that made the home garden vegetables even more important.
46. NORV: That's right. And I've got another figure here that proves it. If you took all of the canned vegetables that are ready for civilian use right now, you'd find that half of them were home-canned.

been partitioned to accommodate soft rock below shale and allo
cated within different zones at 100' increments in response
to geological and topographic conditions as well as the sheer extent
of the area. The stages of gas or steam venting, bermeage
and waste disposal dynamics are evident below. Numerous
sheer surfaces are also seen to be influenced

by the same factors. After the natural and man-made
perturbations have occurred there will always be
various influences upon the nature of shale
surfaces and the properties of natural and man-made gas

vents. In some cases, the natural shale may be
able to resist such changes and continue to function as a
natural gas vent, while in other cases it may

lose its natural properties and become a
natural gas vent, while in other cases it may

Absorption

and absorption can be used to reduce the
amount of natural gas venting.

When natural gas vents are
absorbed by shale surfaces they are able to
reduce the amount of natural gas venting.

Shale surfaces are able to
dissolve shale surfaces and reduce the amount of natural gas venting.

When shale surfaces are dissolved by natural gas
vents they are able to reduce the amount of natural gas venting.

When shale surfaces are dissolved by natural gas
vents they are able to reduce the amount of natural gas venting.

When shale surfaces are dissolved by natural gas
vents they are able to reduce the amount of natural gas venting.

47. BOB: Well, sir, that makes the home gardens pretty important. What's the outlook for this year?
48. NORV: I've got just one fact that I think will give you the picture. The Armed Forces, Lend-Lease, and so forth are going to take half of all the commercially canned fruits and vegetables this year. In other words, the War Food Administration says that the supply of commercially canned vegetables for civilians is going to be smaller in 1945 than it was in 1944.
49. JANET: Ooh! I just felt a small twinge in my ration book.
50. BOB: Well, Ma'am that Victory Garden of yours is an awfully good cure for those ration book blues.
51. JANET: It has been, so far. But let me be sure I understand this...I guess it's pretty clear...but if the Victory Gardens supplied 40 percent of our vegetables last year...and if there are going to be fewer commercially grown vegetables this year...that means we're going to have to do better than ever in our home gardens this year.
52. BOB: You've got it exactly, Ma'am. These Victory Gardens are gettin' more important all the time. And I may be wrong, but I figure that even if the war in Europe ends this year, we're still going to have to have that food.
53. NORV: I'm sure you're right, Bob.
54. BOB: Well, by golly, the more I think about it, the more reasons I can see for folks to get busy with the rake and hoe. Not only does our country need the food...and not only will you get a lot of fun, and a lot of good out of workin' the garden...but there's this, too...just bein' able to go out and pick your vegetables from your own yard whenever you need them...that should be reason enough right there.

For the present writing, nothing could equal such a title, (Lo!)

These words will not do it justice, either.

But the author himself (that's what we call him) is a man of

such a nature that he has established himself in our hearts,

and we have no desire to let him go, or to let him leave us.

He is a man of such a nature that he is a man of the people.

He is a man of such a nature that he is a man of the people.

He is a man of such a nature that he is a man of the people.

He is a man of such a nature that he is a man of the people.

He is a man of such a nature that he is a man of the people.

He is a man of such a nature that he is a man of the people.

He is a man of such a nature that he is a man of the people.

He is a man of such a nature that he is a man of the people.

He is a man of such a nature that he is a man of the people.

He is a man of such a nature that he is a man of the people.

He is a man of such a nature that he is a man of the people.

He is a man of such a nature that he is a man of the people.

He is a man of such a nature that he is a man of the people.

He is a man of such a nature that he is a man of the people.

He is a man of such a nature that he is a man of the people.

He is a man of such a nature that he is a man of the people.

He is a man of such a nature that he is a man of the people.

He is a man of such a nature that he is a man of the people.

He is a man of such a nature that he is a man of the people.

He is a man of such a nature that he is a man of the people.

He is a man of such a nature that he is a man of the people.

He is a man of such a nature that he is a man of the people.

He is a man of such a nature that he is a man of the people.

55. NORV: I agree with you, Bob. We can't afford to be independent like we were before the war. It's smart to raise our own stuff because the truck and tire situation is becoming more critical... the whole transportation situation is, for that matter,....
56. BOB: And labor is a big problem, for the commercial grower.
57. JANET: Even more of a problem now that skilled boys are being taken from the farms for the Army.
58. NORV: Well, to bring this whole food garden picture into focus, I think you'll agree that the outlook is sober, indeed. Now to get very practical for a moment...to you folks who are planning to start gardens...I'd like to remind you of your Agricultural Extension Service. There are branches in every state in the union in the state colleges. You can get all the pamphlets and free advise from them that you possibly need. Their pamphlets will tell you all you need to know about working the ground and planting the seed...That's the Agricultural Extension Service at your state college.
59. BOB: Of course, Norvell, those pamphlets are probably a great help ...they probably tell you how to plant the seeds, how to keep the dirt loosened up a bit...to see that the soil has a little moisture in it, and so.
60. NORV: That's right.
61. BOB: But after you do all of that, there's two things you still have to work on.
62. NORV: I'm afraid I know what you mean.
63. JANET: I think I do too.
64. BOB: Yes sir, first you got weeds. And I got my own method of telling the difference between a good plant and a weed. And I'll be very happy to pass it along, free of charge.

... subsequent to the first time it was used, and the sample
... was also taken before and during off times and retained when off
... activity was interrupted at random and has shown little change
... over time. Since the test conditions and background slightly differ
... between the successive test runs, providing evidence of model bias
... which may be due to the aged bedding dust contamination to some extent
... which will result after

and will furnish, probably, a good illustration of the
present state of affairs. The following extract
from the *Times*, dated April 10, 1861, shows how
the public opinion of Boston and New York
was at that time divided:

the following sentence: "The first time I saw him, he was wearing a
yellow jacket and blue jeans. He had a very tall, thin body, and his hair
was very long and messy. He was wearing a pair of sunglasses and a
black t-shirt. He was standing in front of a building, and there were other
people in the background. He was looking at me with a serious expression."

- * 9 *
65. NORV: Well, this should be very valuable from an experienced farmer like you. How do you tell the difference between a good plant and a weed?
66. BOB: Well, sir, you just pull up the plant...and if it comes up again ...it's a weed.
67. JANET: You still haven't mentioned the other thing you have to watch out for.
68. BOB: I know. If there were 18 and a half million Victory Gardens last year, there were 18 and a half million bugs and beetles.
- 69.. NORV: A conservative estimate.
70. BOB: Well, sir, I have here in my hand the answer to the whole problem. It's a little pamphlet called Victory Garden Insect Guide, and the folks at the Department of Agriculture said I could offer them to you folks, free of charge. It tells you all about the little bugs you're liable to find in your garden...the kind you want, and the kind you don't want. And it tells you what to do about the ones you don't want.
71. NORV: You'll hear how to get this booklet in just a moment from Washington.
72. BOB: And then all you have to do now is go out and start digging. And good luck to you.
73. NORV: Yes sir, we all have an important homefront job, in raising vegetables in our own backyards. Uncle Sam needs our help. It's up to us to give it. Thanks very much, Bob Burns, for visiting us this morning, and our thanks to you, too, Mrs. Atkins. This is Norvell Gillespie, speaking. We return CONSUMER TIME to Washington, D. C.
74. JOHN: Thank you, Bob Burns, and Norvell Gillespie in Hollywood. And now friends...let's hear more about that booklet on Victory Garden Insect Control! Want to tell about it, Holly Wright?

• *Colpoptera* are most abundant near the surface (old) and

are found in greatest numbers off the edge of soil - very small

• *Chironomidae*

• Found throughout the area, especially well up along shore, very rare inland

• *Psectrocladius*

• Found every now and then off bottomless deeper lake and

• *Sciaridae*

• Found in greater numbers than all others around the shore and

• Abundant here, especially in the upper portion of the lake, very small

• *Limnephilidae* (predominant)

• Found in greater numbers near the shore and in the upper portion of the lake

• *Chironomidae* (predominant) especially near the shore, very small

• *Limnephilidae* (predominant) especially near the shore, very small

• *Chironomidae* (predominant) especially near the shore, very small

• *Limnephilidae* (predominant) especially near the shore, very small

• *Chironomidae* (predominant) especially near the shore, very small

• *Limnephilidae* (predominant) especially near the shore, very small

75. WRIGHT: All of you who are going to plant Victory Gardens again this year...will want to have the informative booklet entitled "Victory Garden Insect Guide". It's illustrated with pictures of every insect pest you'll find in your garden...and there's a full description accompanying the pictures. Included also are simple directions telling you how to combat these insect pests. The booklet "Victory Garden Insect Guide" is yours free. Simply drop a card to CONSUMER TIME, Washington 25, D. C., telling your name, address, and the name of the station to which you are listening. Remember...as Bob Burns has told you...it's time to make plans for your Victory Garden this spring. So, right now, send for your free copy of "Victory Garden Insect Guide". Write to CONSUMER TIME, Washington, 25, D. C.
76. JOHN: And now, Mrs. Freyman...let's hear about next week, on CONSUMER TIME!
77. FREYMAN: Next week, we're going to hear a dramatic story! The story of the trade barriers that exist between the states in our United States...barriers that in many cases, cause higher prices on the food we buy and hinder interstate trade.
78. JOHN: So...listen to the story of highway trade barriers on next week's edition of...
